**Optimus EMR, Inc. Announces Partnership Agreement with //SOS/Corporation for Integrated Long Term Care Software**

IRVINE, California – Optimus EMR, Inc. announced today that it has entered into an Exclusive Partnership and Marketing Agreement with Salina Office Services Corporation (“//SOS/Corporation”), a leading Long Term Care Software Company.

This Partnership creates a fully integrated “Best of Breed” Software product which features the LTC Industry leading Optimus EMR/Clinical System with the SOS Corporation suite of Financial/Billing products.

Robert C. Davis, CEO of Optimus EMR, stated “This is an important strategic partnership for Optimus EMR. We have now created an integrated software solution for long-term care facilities that provides the LTC industry the best of both worlds: The Facility Clinical Operations Team receives all of the benefits of the sophisticated Optimus EMR/Clinical System, and the Billing/Finance Department receives all of the benefits of the unparalleled SOS Billing/Financial System. Furthermore, the Optimus EMR System and SOS Billing Suite of Products have been seamlessly integrated through a sophisticated Interface which requires no human intervention by the users and is always real time.

The multidirectional integration is invisible to both Clinical and Financial Department Users.” David R. Shupp, Principal of //SOS/Corporation agrees, "This partnership is one of the most important strategic moves we have made during the last 20 years. Since 1977, SOS has offered leading LTC software, and by pairing our financial suite of products with the Optimus EMR system, we offer a fully integrated solution that is the best in the industry. Given the evolution of the LTC software industry in the past few years, we wanted to focus our resources on our core strength-our financial software system, HelpCare+."

The //SOS/Corporation Suite of Financial Products, HelpCare+ includes:

- Billing / Accounts Receivable
- ADT/Census Tracking
- Resident Funds
- Admission Fee Amortization
- Accounts Payable
- Payroll
- Human Resources
- Employee Scheduling
- Inventory/ Purchasing
- General Ledger
- Financial Reporting
- Fixed Assets
- Prospective Resident Marketing
- Therapy Billing
- CCRC multi level of care features

//SOS/Corporation currently supports most states billing methods and all federal billing for long-term care. Many of these states are in regions which are closely aligned with the Optimus target markets.

#### About Optimus EMR, Inc.

Optimus EMR, Inc. is the long term care industry leader in providing the most comprehensive Electronic Medical Record (EMR), Point of Care documentation tools, “eCharting”, Electronic Medication Administration Record (eMAR), and ePrescribing/Pharmacy Interface Solutions for LTC facilities. The system is designed to conform to all aspects and the intent of HIPAA and fully adheres to the electronic signature and EMR requirements of AHIMA. Additionally, through electronic interfaces the Optimus system shares and receives appropriate medical information with the billing system, admitting and attending physicians, admitting and discharge hospitals, clinical laboratories, institutional pharmacies, and quality assurance organizations. All of these functions combine to improve patient care and facility operations.

According to Robert C. Davis, CEO of Optimus EMR, “The Optimus EMR technology is the only complete EMR solution that has been designed specifically for long term care facilities. Furthermore, the proven implementation and training methods utilized by Optimus combined with the properly designed EMR solution have successfully automated or eliminated many previously manual functions which collectively improves patient care, maximizes reimbursement for the services performed and enhances staff satisfaction and performance. These are all very important benefits for an industry that has compressed margins and staff shortages”.

The combination of clean, accurate and real time information that is interfaced to the facility billing system allows for faster cash collections, fewer rejected claims and lower DSO for the facility. The Optimus EMR System is a mature and time-tested true EMR Solution that has been fully operational in many facilities throughout the U.S. since 2001. For more information call The Company at (888) 242-9080, option #3 or visit the web site [www.optimusemr.com](http://www.optimusemr.com).

#### About //SOS/Corporation

//SOS/Corporation has provided software to the LTC industry since 1977, starting with the first installation at a Continuing Care Retirement Community (CCRC). SOS specializes in financial software for multi-level of care facilities, multi-site organizations, stand-alone Skilled Nursing facilities (SNF) and Assisted Living Facilities (ALF).

According to David R. Shupp, Principal of //SOS/Corporation, "Prior to taking ownership of //SOS/Corporation in 1987, I worked as a Chief Financial Officer at a CCRC in Pennsylvania. It was then that I realized that there were additional software needs for a CCRC, which were not being addressed with software that was developed solely for a SNF". SOS's software was developed to meet the requirements of a CCRC as well as a SNF and ALF. For more information call the Company at (800) 432-SOSC or visit the web site [www.sosc.com](http://www.sosc.com)
