

Once again,  
Optimus EMR  
is way ahead  
of the curve.

## Are you and your software vendor ready for MDS 3.0?

Optimus EMR is the only software company that simultaneously automates the MDS preparation and improves profits and patient care. Now is the time to upgrade your clinical software to take advantage of true point-of-care charting as well as to automate the MDS process. Optimus will train your staff in the proper approaches for MDS 3.0 and help you redesign your clinical workflow.

The MDS 3.0 is more than a reimbursement form. It involves five-star ratings and new survey tags. The industry is changing and demands that you keep pace.

It is no coincidence that Optimus EMR customers out-rank the national average on the new five-star rating system with over 65% of our customers earning "fours" and "fives." Our customers are great - our goal is to help make them better.

And if you're wondering how to get started, it's easy. We have several entry points with costs and implementation plans to meet your budgetary needs. The Optimus EMR system is fully integrated with the //SOS/Corporation suite of billing and financial systems.

**Optimus EMR - The Only Automated and Comprehensive EMR System for LTC. Including the only fully functioning eMAR/eTAR with pharmacy interfaces.**

 OPTIMUS | EMR™

Setting the standard for EMR solutions in long-term care.
