Optimus EMR, Inc. Customers Introduced to New Release at OIE

IRVINE, California – Customers from 22 states recently gathered in Tampa FL at the Optimus Information Exchange to learn about the latest innovations in Optimus EMR software. These new elements were introduced on October 2 and activated on October 31, 2014. Introductory training occurred on all of these modules as well as the ICD-10 diagnosis mapping tools that will be used in 2015 when the customers convert from ICD-9 to ICD-10.

- Third generation eMAR with Bar Coding and refills
- 24 Hour Shift Report
- Clinical Decision Support Tools
- On Time Analysis of Hospital Readmissions
- NCPDP Script 10.6 Interfaces will all major pharmacy software and pharmacies
- INTERACT III
- The MDS Worksheet (released earlier)

These innovations continue a commitment from Optimus to be at the forefront of development of Electronic Medical Records for Long Term Post- Acute Care providers.

Robert C. Davis, CEO of Optimus stated “These new elements not only help our customers more effectively care for their residents and improve outcomes but also provide the customers with more tools to succeed in the new environment of ACOs, managed Medicaid and bundled payments”.

The Optimus EMR System is a mature and time-tested true EHR Solution that has been fully operational in hundreds of facilities and 35 states since 2001. For more information call The Company at (888) 242-9080, ext. 214 or visit the web site www.optimusemr.com.
