Optimus EMR, Inc. Completes Transition to NCPDP Script 10.6

IRVINE, California – Optimus EMR, Inc. announced the successful and timely transition with its major pharmacy partners from HL7 to NCPDP Script 10.6 interfaces. Omnicare, Pharmerica, and all pharmacies using Framework LTC pharmacy software which includes RemediRx completed the transition before the mandatory November 1st effective date.

“This transition reflects a solid, unified effort by these pharmacies and the Optimus engineering team” commented Robert C. Davis CEO of Optimus. “Our customers and their residents will continue to experience the full benefits of the Optimus CPOE and eMAR/eTAR modules as a result of this transition”.

The Optimus EMR System is a mature and time-tested true EHR Solution that has been fully operational in hundreds of facilities and over 35 states since 2001. For more information call The Company at (888) 242-9080, ext. 214 or visit the web site www.optimusemr.com
